

With deep gratitude to all
those with whom we share
a world.

We are not the same

Thank goodness.

About this zine

The pages of this zine are the result of a workshop held as part of the Irish Learning Technology Association's EdTech conference at Dublin City University in June 2026, hosted by the moderators of the Library of Babel Group.

Although the Library of Babel Group is critical of "AI" technologies in education, the artwork collected in this zine represents a wide diversity of educator perspectives, each responding in the moment to one or more of the following questions:

- How does the idea of "AI in education" make you feel?
- What is your favourite metaphor of AI?
- Who is someone whose ideas inspire you?
- What is a value you'd like to protect, promote, celebrate in education?

Some of the pages are signed by their creators, and some are shared anonymously.
